AUSTRALIAN BUREAU OF STATISTICS

This <u>Compendium</u> brings together a wide range of statistics for each local government area, as a service to users of small area statistics. Most of the statistics have appeared in other ABS publications dealing with specific subject areas. Additional statistics for individual local government areas are shown in specific ABS publications and are available on request.

This is the seventh issue of the <u>Compendium</u> (which was previously named the <u>Compendium of Municipal Statistics</u>). The <u>Compendium</u> is published at intervals of about three years and the previous issue was published in 1979.

D.N. ALLEN

EXPLANATORY NOTES AND DEFINITIONS

Local Government Areas

There are 49 local government areas in Tasmania (45 municipalities and the cities of Hobart, Launceston, Glenorchy and Devonport) which are grouped into four statistical divisions. (The Northern and Mersey-Lyell Statistical Divisions are each further divided into two sub-divisions.) The divisional structure is indicated in the map on page 5 of this issue and in the listing on page 42. Four southern municipalities are partitioned between two statistical divisions the Hobart Statistical Division and the Southern Statistical Division. These are indicated by the symbols (H)(S) denoting that part of the area is in the Hobart Division and the balance in the Southern Division. A single symbol (H) or (S) indicates that a local government area is wholly included in one statistical division. A map showing the Hobart Statistical Division appears on page 43.

Notes Applying to Particular Items

Item descriptions have been abbreviated to conserve space and no explanatory notes appear beneath tables. Before using any of the statistics, the reader is advised to refer to the relevant explanatory notes and definitions applying to particular items which are set out below:

Item no.	Item	Explanatory notes and definitions
1 .	Area	Areas controlled by each Local Government Authority to the nearest 10 square kilometres.
2-7	Estimated Resident Population	Population estimates were compiled on a new basis from June 1981. Previously, estimates were based on where people were counted on census night, updated annually by births, deaths and estimates of movements between States and LGA's. Using 30 June 1981 census results, estimates are now based on where people "usually reside". To present a consistent series, estimates on this basis have been compiled for all years from 1976.
8	Average Annual Increase in Population	The compound annual rate of growth between 1976 and 1981 based on the estimated resident population in items 2 and 7.
9	Births	Births are coded to the LGA of usual residence of the mother. Births in Tasman to mothers usually resident outside Tasmania are excluded and births registered elsewhere in Australia to mothers usually resident in Tasmania are included.
10	Deaths	Deaths are allocated to the LGA of usual residence of the deceased. As with births above, deaths of Tasmanian residents which occur interstate are included and deaths in Tasmania of visitors to the State are excluded.
11-60	Census of Population and Housing	Items 11-60 present a summary of the results of the 1981 census of population a housing. All the results are "as counted" at the census. Since any census wil fail to count every person the results will differ from population estimates in items 2-7. In addition census results are presented on the basis of where peop were located on census night while population estimates allocate people to the LGA in which they normally reside. All small non-zero cells have been randomly adjusted to preserve the confidentiality of individuals and no reliance should placed on cells of three or less.
33	Families	More than one <u>family</u> can constitute a single household (see below for household definition). Having determined the head of a household one or more families are identified based on specific relationships to the head of that household.
34	Households	For census purposes a household is a person or group of people who live togethe as a single domestic unit with common eating arrangements. More than one household can live in one house or structure.
35-37	Employed Persons	Persons aged 15 years and over who did any work in the week preceding census da or who had a job of any kind but did not work because they were on holiday, strike, stood down or sick, etc.
38-40	Unemployed Persons	Persons aged 15 years and over who did not work in the week preceding the censuland who were actively looking for work during that week.
41	Total Labour Force	The sum of employed and unemployed persons aged 15 years and over.
42	Persons Not in Labour Force	All persons who were neither employed nor unemployed in items 35-40.
43-55	Industry - Employed Persons	Industry is the type of productive activity, business or service carried out by the establishment in which the person was employed. Within any establishment people may perform a variety of occupations but all will be classified to the same industry. Classification of establishments to industry is based on the major activity of the establishment in accordance with the Australian Standard Industrial Classification (ASIC). Persons are counted in the LGA where they spent census night although their industry classification relates to the place which they work, which may be located in another LGA.
56	Occupied Private Dwellings	An occupied dwelling is the premises occupied by a household on census night. Private dwellings are normally houses, rooms or flats but may also be tents, houseboats, caravans, etc. where they stand on their own block of land, etc. I does not include hotels, motels, boarding houses, caravan parks, etc.
57	Unoccupied Private Dwellings	An unoccupied dwelling is a structure built specifically for living purposes an capable of being lived in but which is not occupied on census night. Vacant tents, garages, houseboats, caravans, etc. are not included unless they are

normally occupied.

Item no.	Item	Explanatory notes and definitions							
58-60	Nature of Occupancy	The number of households classified according to whether the dwelling they occup is owned or being purchased, rented from a housing authority or other (which includes tenants renting from another person or agency).							
61-62	Education	Students are recorded in the municipality where their school or college is located.							
63-66	Building	Statistics of building approvals are compiled from: (i) permits issued by local government authorities covering those areas subject to building control by these authorities; (ii) contracts let as day labour work approved by Federal, State, semi-government and local government authorities. Approval statistics cover all new dwellings, new 'other building' jobs valued at \$10 000 and over and alterations and additions (to dwellings or other buildings) valued at \$10 000 and over.							
63	House	A 'House' is defined as a building which has been designed or adapted so that its prime purpose is to be a single self-contained (i.e. including bathing and cooking facilities) dwelling unit which is completely detached from other buildings, and occupies (except in such cases as dwellings built for employees of families of the owner or lessee of the land) a separate titled block of land.							
64	Other Dwelling	An 'Other dwelling' is defined as a self-contained structural dwelling unit other than a house as defined above. Included in this classification are flats, home units, semi-detached cottages, villa units, town houses, etc.							
67-91	Local Government Finance	These details are based on the annual statement of accounts submitted by each local government authority.							
68 sign	Receipts - Licenses, fees, fines	This category relates to a wide range of licenses and fees usually associated with the granting of a permit or privilege or regulation of an activity, and is not designed primarily to raise revenue. These receipts are distinguished from charges in that they are compulsory payments where no direct tangible benefit accrues to the payer.							
69	Receipts - Charges	Revenue from sales of goods or services or rent of properties. Includes sanitary charges, parking fees (but not fines), subdivisional and seating fees and other fees (so called) for which a direct service is provided such as trade waste disposal, tipping fees.							
72	Receipts - Other	Comprised of transfers from trading activities, ex-gratia receipts (non rateable properties), advances paid by public, sale of land and other fixed assets, contributions and donations received and reimbursements.							
78	Outlays - Other	Levies paid to governments, donations paid, advances paid to public and transfers to trading activities.							
79-88	Trading Activities	Activities classified as Trading activities are water supply, sewerage and abattoirs, all other activities are classified as ordinary services.							
79	Trading Activity Current Income - Other	Sales and charges, interest received and transfers from ordinary services.							
82	Trading Activity Current Outlay – Working Expenses	Wages and salaries, purchase of goods and services, payroll tax and depreciation.							
83	Trading Activity - Current Outlay - Other	Levies paid to government and semi-government authorities and transfers to ordinary services.							
	point the week preceding ork hor	23-34 Employed Persons Persons aged 15 years and over who did only or who had a job of any kind but did not a							
86	Trading Activity - Capital Transactions, Source of Funds Used - Other	Includes reimbursements, depreciation allowances, contributions and donations received, advances repaid by public, sale of land and other fixed assets, surplus on current account, reduction in bank balances, etc. A negative amount can arise when, for example, there has been a temporary increase in bank balances (perhaps resulting from loan monies raised but not yet spent).							
88	Trading Activity Use of funds - Debt redemption	Includes increases in stocks and advances to public for the following LGA's: Sorell, \$38 200; Huon, 1 200; Latrobe \$45 900.							
90	Year of Last Property Revaluation	Effective from 1 July of the year shown.							
92,93	Roads .	Includes: (i) roads controlled by the Department of Main Roads and local government authorities; (ii) Hydro-Electric Commission roads and; (iii) Forestry Commission roads.							
93	Roads, Other	Includes roads paved with gravel or stones, and roads formed or cleared only.							
94	Rural Establishment	An establishment is included in agricultural statistics if the enterprise operating the establishment had or was expected to have an estimated value of agricultural operations of \$1 500 or more during the current season.							
95	Area of Rural Establishments	Includes freehold and rented land, and Crown land leased, licensed or in the process of alienation. The total area of all rural establishments is counted, including those parts of establishments not used for agricultural or pastoral purposes.							

Item no.	Item	Explanatory notes and definitions					
96	Area used for Crops	Includes area used for orchards and small fruits, but excludes area of pasture cut for hay, seed or silage. Areas double cropped are only counted once in this item.					
98,99	Cereal crops	Barley, oats, rye, triticale and wheat harvested for grain.					
100,101	Hay	Includes oats, barley, wheat, rye, lucerne, grasses, clover, etc. cut for hay.					
102	Green feed	Includes cereal crops, other crops, vegetables and pastures used for green feed and silage.					
107,108	Green peas	All green peas, whether sold in the pod (estimated ex-shell weight) or shelled (for processing).					
117-120	Livestock	Number of livestock on rural establishments at 31 March 1981.					
118	Cattle	All cattle, bulls, cows and heifers and calves on rural establishments whether for milk production or for meat production.					
123	Fleece	Average fleece weight per adult sheep. Includes crutchings but excludes fleece from lambs.					
124-127	Manufacturing	Excludes electricity and gas establishments which are allocated to the 'Electricity, gas and water' division under ASIC. Since 1975-76, under new collection criteria, only a limited range of data (employment and wages and salaries) is collected from single establishment enterprises with less than four persons employed.					
125-127	Employment in Manufacturing	Includes working proprietors and employees on the payroll and those working at separately located administrative offices and ancillary units.					
128	Wages and Salaries	Includes wages and salaries of all employees of the establishment and those working at separately located administrative and ancillary units. Drawings of working proprietors are excluded.					
129	Retail Establishments	In accordance with the ASIC the basic unit is referred to as the establishment. Generally, it covers statistics collected for all operators carried on under the ownership of one enterprise (business) at a single physical location (e.g. an individual retail store). A retail establishment is thus one predominantly engaged in retailing activities, but the data collected for it cover all activities at the location. The establishment statistics also include data relating to separately located administrative offices and ancillary units (such as head offices, repair and maintenance workshops, storage units and transport units) serving the establishment and forming part of the enterprise which owns and operates the establishment.					
130-132	Employment in Retail	Working proprietors and employees (including both full time and part time) on the payroll, including those working at separately located administrative office and ancillary units. Unpaid helpers are excluded.					
133	Turnover	Sales of goods (retail and wholesale) and all other operating revenue from outside the enterprise.					
134	Tourist Accommodation	Includes licensed hotels and licensed and unlicensed motels, private hotels and guest houses which provide a bath or shower and toilet in most rooms and have breakfast available for quests.

```

Publications similar to this Compendium which bring together a range of statistics on local government areas and statistical divisions are produced for each Australian State by the respective State offices of the Bureau.

Further information about Tasmanian Office ABS publications is included in the <u>Catalogue of Publications</u>, <u>Tasmanian Office</u>, 1980. All publications produced by the ABS are listed in the <u>Catalogue of Publications</u> (1101.0) which is available free of charge from any ABS office.

Other Services Available from the ABS

Australian Municipal Information System (AMIS): Local government area statistics are provided through the AMIS service; this contains a range of data on a comparable basis for each local government area (LGA) in Australia. The data are available in the form of computer printout, photostat copies of computer printout (reduced to about half size), microfiche, or on magnetic tape for input to a user's own computer. A printed AMIS Manual of approximately 185 pages describing the System and how to interpret the data is also available. An updated edition is expected to become available in early 1983. There will be a small charge for the later edition.

The range of topics covered by AMIS includes: (i) population census; (ii) dwelling characteristics; (iii) area and property valuation; (iv) manufacturing activity; (v) retail activity; (vi) rural activity; (vii) population estimates, births and deaths; (viii) building activity; (ix) roads; and (x) local government authority financial data.

AMIS was developed to provide comparable data on the revenue collected and the expenditure on services provided by L.G.A.'s. Most information provided is of this type with the other data being included to assist in classifying the individual L.G.A.'s in various ways. As well as actual figures for each of the last eight financial years, some derived percentages and per capita figures are shown.

Data available from AMIS are generally not as up-to-date as data included in the most recent issues of printed publications. Users can obtain details relating to selected L.G.A.'s or to any grouping of L.G.A.'s within a State.

Standardised Local Government Finance Statistics (SLGFS): The ABS now offers a service known as Standardised Local Government Finance Statistics (SLGFS). This service provides a wider range of local government finance statistics than AMIS on a uniform basis both within and between States in Australia. It is available on magnetic tape and microfiche and offers a data file containing a standard range of items for all local government authorities in Australia.

SYMBOLS AND OTHER USAGES

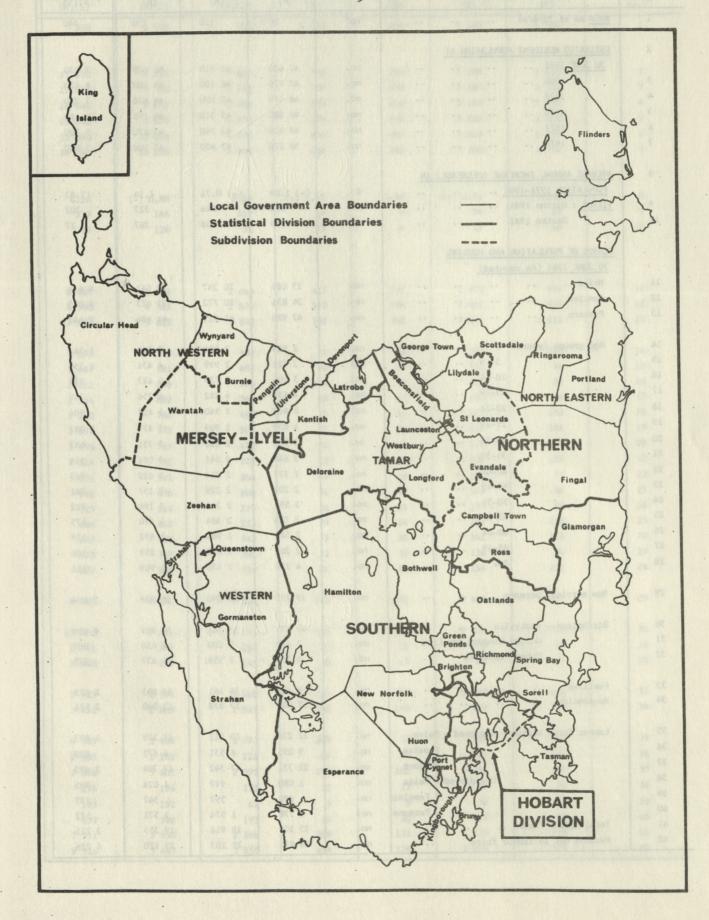

The following standard symbols are used in publications of the Tasmanian Office of the Bureau:

ASIC	Australian Standard Industrial Classification	r	figure or series revised since previous issue
М	males; F females; P persons	accomple 5909	not applicable
n.a.	not available	Tables -	nil or less than half the unit shown
n.e.c.	not elsewhere classified	LARY OR STATE	break in continuity of the series (where drawn
n.e.i.	not elsewhere included	ADT ATOMESE	across a column between two consecutive figures)
n.p.	not available for separate publication	(H)	located in Hobart Statistical Division
	but included in totals where applicable	(5)	located in Southern Statistical Division
n.y.a.	not yet available	(H)(S)	parts in both Divisions.
n	preliminary - figure or series subject to		

Values are shown in Australian currency.
